

Training	FleetBroadband & Global Xpress
Module(s)	JUE-251, JUE-501, JUE-60GX
Target group	Service Engineers
Location	Rotterdam Office (Schaardijk 23, 3063NH, Rotterdam)
Duration	2 days
Price	€400,00

DESCRIPTION

This training examines the installation, operation, maintenance and commissioning of JRC's FleetBroadband models equipment. The current and previous products are covered in the training. It includes the JUE-251, JUE-501 and JUE-60GX (all operating via Inmarsat).

The JUE-251 and JUE-501 are similar products but mainly different in scope, speed and therefore size.

The 251-model weighs 4.7 kg whereas the 501-model is 20 kg. Although they can be used separately, they are usually connected to the JUE-60GX. There will be opportunities to gain some practical hands-on experience on our training equipment during term of the course.

CURRICULUM

Some of the key points covered in this training (in both theory and practice) are:

- Product specifications
- System overview
- Installation
- Commissioning
- Troubleshooting/repair
- Replacing parts of antenna
- Software update procedures (where appropriate)
- Technical developments relating to our products

ENTRY REQUIREMENTS

- Basic knowledge of Windows
- Basic knowledge of radar electronics
- Understanding of industry standards IEC61162-1 and IEC61162-2
- Service engineer must be employed at distributor in Europe, Russia, Africa or Middle East
- Service engineer is recommended to have at least one year of field experience
- Service engineer is required to bring their work PC (as they will be required to update software during the course)

CERTIFICATION

- This course ends with an examination on the second day of which the service engineer is required to answer at least 70% correctly in order to receive a certificate.
- With this certificate the service engineer is allowed to perform the installation, operation, maintenance and commissioning of all JRC's FleetBroadband & GX equipment as mentioned above.
